La logique naturelle, quel avenir ?

On n'a pas d'avenir
Quand on n'a pas de passé!
Ferdinand Braudel

Le présent serait plein de tous les avènements,
Si le passé n'y projetait déjà une histoire
André Gide

Abstract: For some fifty years natural logic of the Neuchâtel school has been developed, then used. The basic principles which characterised it have been clarified and also the properties and the mechanics of many type of discours have been revealed. As for the time being, it's time to carry out an assessment relating to it. It's also time to reconsider its validity, to refine the analytical methodology associated to it and to use computer tool to make it capable to describe the schematisation a fany discours analysed. It's in this trend that we want to develop some ideas.

Keywords: Natural Logic, argumentation, representation, formalization.
