Qu'est-ce que la problématique ? Les points clés d'une théorie

What is Problematology? The key points of a theory

Abstract: The current paper tries to draw the outline of a philosophical conception of the latest novelty: problematology. It belongs to the Belgian philosopher Michel Meyer and has as a starting point the creative valorization of the concept of interrogation. For the invoked philosopher, human thought is set in motion, that is, it becomes "a thought in action", when it is faced with a problem and wants to overcome it. The outward sign of this state of grace of thought is the question, the interrogativity, in general. Several categorical couples cover the vast and profound issue of this conception and make it a center of interest for specialists and a point of attraction for the interested reader: question and answer, identity and difference, apocritical and problematological answer, problematological difference and problematological situation.

Keywords: problematology, questioning, interrogativity, problem, propositionalism.
